Reviews the Latest Theories Explaining Muscle Loss and Accretion During Illness Infection In chapters one through five, the book presents the background science on the relationship between illness and muscle weight loss, highlighting bioactive peptides ability to enhance the body s antioxidant status, antiseptis capacity, immune function, anti-inflammatory capacity, growth potential, and appetite. Chapters six through nine deal with the use of bioactive peptides to modify aspects of the host response to illness, including inflammation, antimicrobial activity, anabolic dysfunction, and anorexia.
