A Brighter Tomorrow: Fulfilling the Promise of Nuclear Energy

By Domenici, Pete V.; Lyons, Blythe J.; Steyn, Julian J.

Rowman & Littlefield Publishers, 2006. Book Condition: New. Brand New, Unread Copy in Perfect Condition. A+ Customer Service! Summary: The book takes a proactive and, at times, provocative look at nuclear power and argues that it is the source of energy for the future of the United States. Senator Pete V. Domenici (R-New Mexico) will argue that after weighing the costs and benefits of all other legitimate forms of energy production (coal, oil, wind, hydro) nuclear power will not only reduce American dependence on the Middle East oil but it is the most "green" source. Domenici is the primary author and sponsor of the energy bill weaving its way through the Senate - the nuclear energy portion of the bill will, among other things, assist in the financing of the construction of three new nuclear power plants (the first in 30 years). Sprinkled throughout this otherwise serious book will be 30 years worth of anecdotes and insights into the personalities behind the political process and policymaking.

Reviews

This pdf is really gripping and intriguing. It was actually written very completely and beneficial. You won't really feel monotony at whenever you want of your time (that's what catalogues are for about in the event you request me).

-- Ms. Gracie Nicolas

A very awesome ebook with perfect and lucid information. It is really simplified but unexpected situations in the 50 % of your pdf. I am pleased to let you know that here is the greatest book I have studied inside my very own lifestyle and can be the greatest ebook for at any time.
