Brand New Book ***** Print on Demand *****.Excerpt from Class-Book of Elementary Mechanics, Vol. 1: An Introduction to Natural Philosophy, Adapted to the Requirements of the Revised New Code; Matter Some three years ago the Liverpool School Board resolved to introduce experimental science teaching into their schools, and the writer was appointed to organise a scheme of demonstrations in accordance with this resolution. The subject selected for demonstration in the boys schools was elementary Natural Philosophy, or Mechanics as defined in Schedule IV. of the Revised Code. The experience gained in the practical carrying out of that scheme has led to the production of the present work. It is primarily intended as a lesson book to be used by the scholars in the intervals between the experimental demonstrations. The difficulty hitherto has been to get the children to express, in anything like precise language, the ideas which the experiments have suggested to their minds. It is hoped that a careful reading of the following lessons week by week, supplemented by the comments and explanations of the teacher, may go a long way towards removing this difficulty The exercises at the end of each lesson are believed to constitute a valuable feature of the book if properly used. They deal for the most part with practical applications of the principles set forth in the preceding lesson, and have been specially designed to stimulate the observing and reasoning faculties of the scholars. Each exercise, in fact, might furnish a theme for conversation between a teacher and his class. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
